Eg: Back Acne, Chest Acne, Post Surgery Scar, etc
Cleanse of area, LED and moisturizer.

OxyGeneo™ (Oxygen) Super Facial (1 hr) \$135

OxyGeneo™ Oxygen infusion pod, LED session, and mask of your choice.

OxyGeneo™ Facial Device is the ultimate facial experience. It provides deep exfoliation of the upper skin layer to remove dead skin cells using a specialized hand piece and OxyPod capsules mixed with the preparation gel. They then exfoliate, oxygenate and nourish the skin.

Harnessing natural oxygen molecules from within the skin, it creates the Bohr effect on the skin. It creates tiny little CO2 bubbles on our skin. The skin is oxygenated and refreshed. The increase in oxygen on the skin surface contributes to younger, smoother and healthier looking skin, increases the blood flow and the natural metabolic processes. Includes hand and arm massage.

Body Treatment - Microdermabrasion Back or Chest

(1 hr) \$120

A physical exfoliation that combines an exfoliating diamond tip and a vacuum suction system is used for the body area. Microdermabrasion will leave your body area visibly smoother, brighter and clearer.

Suitable for most skin types. This includes Cleanse, Microdermabrasion session, LED session, Hydrojelly Mask and moisturizer.

All products used are in the Elysee Scientific Skincare range and are also available to buy for home use.
